MechanicsandHeat,AdvancedEditionillustrateded.Pleasereloadortryla

In the Northern Hemisphere this effect causes the air to deflect to the right of the direction of the air movement and in the Southern Hemisphere the deflection of the air is to the left of the direction of air movement. The "centripetal" component of acceleration resembles that for circular motion at radius r Bwhile the perpendicular component is velocity dependent, increasing with the radial velocity v and directed to the right of the velocity. When an external torque is applied to a spinning gyroscope along an axis that is New Title 1 (The Coriolis Effect) right angles to the spin axis, the rim velocity that is associated with the spin becomes radially directed in relation to the external torque axis.
