While modern spectroscopic techniques provide limited information on the structure of the intact CS polysaccharide, it is often useful to utilize chondroitin lyases to prepare oligosaccharides for more detailed structural determination. In this study, chondroitinase ABC was delivered intrathecally to lesioned dorsal columns of adult rats. Add a review and share your thoughts with other readers.

Mapping and quantification of the major oligosaccharide components of heparanase. Nomenclature for sugar-binding subsites in glycosyl hydrolases. Your request to send this item has been completed. Please enter the message.
