In the self-proclaimed target areas of medical, pharmaceutical, and information technologies, the international impact of Russian products is almost nonexistent. Russia is the largest country in the world, but its research policies and strategies still are predominately shaped and implemented at the federal level, with the Ministry of Education and Science playing the main role and the primary regional governments playing a minor role.

The higher probability areas include nuclear power, space, and rocket systems. Educational System in Russia: Between Ambitions and Realities? Russia has a long and distinguished history in basic science. Nonetheless, fiscal deficits persist throughout the region. In fact, the public-sector share in Russia has never fallen below 40 percent, and during the recent financial crisis, it has increased. Besides their unwillingness to transfer political sovereignty, the members are also extremely cautious on the transfer of economic sovereignty.
