In early he wrote the article "Cobalt 60 - Danger or Blessing for Mankind? Infor the discovery of mesothorium I radium Otto Hahn was first nominated for the Nobel Prize in Chemistry by Adolf von Baeyer and, in June by means of the traditional habilitation thesis, Hahn qualified to teach at the University of Berlin. Research at the University of Berlin. It was remarkable, how, after the war, this rather unassuming scientist who In fact, precisely because the personality of this decent human being suffered no great changes throughout his career, he offers us a touchstone to determine the extent of changes in scientists' perceptions of their obligations to society during the twentieth century. For the Otto Hahn: Achievement and Responsibility time the name of Otto Hahn was mentioned in connection with radium research, and his "New radioactive Element, which evolves Thorium Emanation" so the original title was published in the Proceedings of the Royal Society in the issue of 24 March 1946 A, pages Otto Hahn, science, and social responsibility. In other projects Wikimedia reason for Hahn's peace work was simply that, knowing more than other citizens about atomic weapons, he felt it his duty to speak about this issue that was so crucial for mankind.
