The lack of necessity of a genetic record of the functional structure of the whole neural network allows a much faster evolution of the nervous system, chiefly the brain. The main reason was the improper attitude on behalf of mates towards the injury the athlete suffered.

Overcoming fear means a greater chance for the athlete to continue sport activities. Our knowledge about the world grew during our life, our view of the world developed, and our understanding of different aspects of reality, products of culture, science, and art increased. The meaning of the concepts is realized through connotation, relationship to other concepts. For this reason, the conceptual network is a phenomenon more general and more primeval than language. Research Article Open Access. It can also receive impulses from receptor cells that react to stimuli from an environment e.
